

Project Title: Comprehensive Sustainable Energy Strategy and Project Implementation

Client: Children's National Medical Center, Washington, D.C.

Scope: Sustainable Energy Partner and advisor for Children's National to create and implement a short and long term sustainable energy strategy to improve energy and financial performance while meeting operational needs within the highly complex medical campus.

Responsibilities: Beginning in 2010, E³ performed energy auditing and facility benchmarking to identify low cost, high return energy saving opportunities as well as longer term capital investment opportunities in sustainable energy. Reported findings to senior executives and facilities and engineering management.

Results: Have begun implementing low cost solution pilot projects. And have renegotiated a contract with an energy provider resulting in more than a 20% savings or \$750,000 per year. The project is ongoing.
